

Senior Dental Care

- Brush and floss daily to prevent gum disease and tooth loss.
- Stay hydrated to avoid dry mouth, which can increase decay risk.
- Clean dentures daily and remove them at night.
- Visit your dentist regularly for oral cancer screenings.
- Manage chronic conditions (like diabetes) that affect oral health.
- Report any mouth sores, pain, or changes to your dentist promptly.

Good oral health is important at every age. We're here to help you keep your smile healthy!
